# Haytham Abbas

BDS, MFDS (RCS Eng), Diploma Implant Dentistry  
GDC No. 101012

With over 10-years Implantology experience behind him, Haytham provides sedation and implant treatments, providing patients with the option of being relaxed and comfortable through their implant journey. He finds treating anxious patients very rewarding, and his experience with sedation means he can provide quality care for patients who would otherwise be too nervous to have treatment. His experience with implants has led him to carry out a wide variety of treatments, from straight forward single tooth implants to complex full arch cases. The joy on his patients' faces when they return having been able to be confident in smiling or going out for meals is what he strives to achieve for every patient.
